

Crest National Selects Eclipse ImageEncoder

February 20, 2001

Eclipse Data is pleased to announce that Crest National has selected the Eclipse ImageEncoder for installation in its new Nimbus UV LBR and upgrade of an installed LBR. Innovative features like high-speed DVD & CD mastering, ImageIntegrity checksum protection, direct and hard disk mastering, multi-tasking networking capabilities and support of all major DVD & CD formats and encryptions provided the competitive advantage in Crest's selection of the Eclipse ImageEncoder.

"Crest National expects the highest quality and most reliable equipment for our CD and DVD mastering and replication facility. In selecting an equipment vendor, we also evaluate after the sale service and support. Due to our customer's requirements, it is critical that our vendors offer world class support of their products," said Bob Freedman, Sr. V.P. for Crest National. "Based on our experience and satisfaction with Eclipse's pre-mastering and Q.C. verification software, and their exceptional technical support and customer service, we included Eclipse in our evaluation of encoders for our new UV LBR. We decided on the ImageEncoder because of its superiority in performance, ease of use, and the support that Eclipse provides."

"We are pleased with Crest's selection of the Eclipse ImageEncoder for installation in their new Nimbus LBR and upgrading of an installed LBR. It was especially rewarding knowing the ImageEncoder met or exceeded the stringent DVD and evaluation criteria that Crest submitted the encoder to in their evaluation," stated Bob Edmonds, VP of Sales and Marketing for Eclipse Data. "Results of Crest's evaluation clearly identified the Eclipse ImageEncoder as the best encoder available for their application."

The success of the Image Encoder is credited to its user-friendly interface, innovative design and solid performance reputation. The ImageEncoder has become the encoder of choice for customers installing new LBR's, large independent LBR manufacturers and customers wanting to upgrade existing LBR's.

Eclipse has built a reputation for technical excellence and world-class customer support with its line of mastering, pre-mastering and QC verification tools for the DVD and CD manufacturing industry.
