

Sony Includes Eclipse ImageEncoder in New Master Code Cutter

February 20, 2001

The Eclipse ImageEncoder formatter has been selected by Sony Factory Automation to include in their new Master Code Cutter using Blue Laser Diode technology recently installed at Maxell Corporation of America in San Diego, California.

"Eclipse is pleased to have been selected by Sony as supplier of the encoder. Eclipse has developed a proprietary ImageEncoder interface to support the new Sony semi-conductor code cutter. In addition, Eclipse has committed to providing the on-going technical assistance necessary to ensure success of the program," said Bob Edmonds, VP of Sales & Marketing for Eclipse Data. "Eclipse appreciates the opportunity to participate with leading OEM's in their programs, thus ensuring Eclipse will have the master encoding technology necessary to support future mastering systems."

Eclipse has built a reputation for technical excellence and world-class customer support with its line of mastering, premastering and QC verification tools for the DVD and CD manufacturing industry.
