

# Eclipse ImageEncoder Preferred by South American Mastering Facilities

February 12, 2002

M3/REPLITECH – Los Angeles, California – Eclipse ImageEncoder Systems have become the encoder of preference in South America. Recently the three major mastering facilities in South America purchased Eclipse ImageEncoders for installation in their new Laser Beam Recorders, or for upgrading existing LBR's.

Bob Edmonds, VP of Sales & Marketing for Eclipse stated; "We are very proud of this accomplishment. This represents another significant milestone for Eclipse, but even more importantly we appreciate the enthusiastic acceptance we have experienced in the South American industry. Our success comes from listening to our customers and providing clear solutions for their mastering needs. In addition to working closely with our customers on a one-to-one basis, we put a great deal of effort into customer relationships and after-sales customer support."

The Eclipse ImageEncoder supports all recordable formats and the latest encryption schemes. Eclipse's proprietary ImageEncoder incorporates the latest in analytical, encryption and device support while providing high-speed encoding technology. Its easy-to-use user interface is designed to make manufacturing's job easier, while providing the mastering engineering staff with access to over 400 selectable "analysis rules" to monitor, flag and report key mastering parameters. The multi-tasking, multiple image handling ImageEncoder supports direct mastering, or high-speed mastering from hard disk or the network. The extensive list of features includes expert analysis, a remote scheduler, advanced DSV algorithms, ImageIntegrity checksums and support of major encryptions including both CSS and Macrovision encryptions.

## About Eclipse:

Eclipse, recognized as the new leader in DVD and CD mastering encoders and software provides leading edge capability with a reputation for technical excellence and world-class customer support in its line of mastering, premastering and QC verification tools. Eclipse is the recipient of three TapeDisc Business Magazine Technical Excellence Awards for 2002. The awards were presented for excellence and innovation for its EclipseSuite Software, ImageEncoder Mastering System and EclipseSuite CSS Verification Plug-In products.
