For Immediate Release

Bestdisc Chooses Eclipse for Blu-ray Expansion

Pleasanton, CA, July 24, 2007

Eclipse announced today that Bestdisc Technology has installed their ESP 7000 Blu-ray formatter and EclipseSuite BD premastering and QC software for the production of Blu-ray discs.

Bestdisc is one of Taiwan's largest DVD replicators. Outside of Japan, this installation makes them the first company to provide Blu-ray replication service in Asia putting Bestdisc in a strong position to support early Blu-ray adopters and help grow the Blu-ray format.

"After evaluating all options, the choice to use Eclipse was easy," stated Sam Yang, Vice President for Bestdisc. "We have come to trust their products and after-sales-support. This is a critical factor when choosing a technology partner."

Critical to the success of the evaluation, installation, and process optimization was the participation of Limbic, Eclipse's agent for the region. Limbic brings strong customer support and a great knowledge of the next generation mastering process.

"It is our great pleasure to complete a cost-effective and efficient BD ROM production procedure with professional partners like Eclipse, Sony and others. As a pioneer of producing BD ROM discs in Taiwan, Bestdisc is ready for cooperating with worldwide customers to carry out a splendid life with high quality BD ROM disc. We welcome any inquiries about our business, service and products," added Yang.

The Bestdisc installation is the latest in a series of next-generation format successes for Eclipse. Working with Sony and other key partners, Eclipse developed strong products and process knowledge early on in the introduction of Blu-ray. Every BD factory in the world uses Eclipse's equipment.

One of the keys to Eclipse's success is their Blu-ray analysis engine containing hundreds of new rules designed to find and fix Blu-ray authoring and conversion mistakes. With the next generation processes, it is more important than ever to catch these mistakes as early as possible in the process.

About Bestdisc

Bestdisc was founded in 1999 as a specialized manufacturer for pre-recorded discs have been already affirmative by the worldwide OEM/ODM customers. After 2 -year research and development, a whole new factory rises straight up in Bestdisc to be specially designated for BD ROM production space. It shall be a crucial moment to Taiwan's optical disc industry representing sustainable development and production of the next generation disc format.

Well-educated employees, strict source management, cautious production control, faultless quality assurance inspection, packing and delivery monitor, intelligence property security maintenance and periodical customer's satisfaction track have been already certified by the extensive customers. But mostly important, Bestdisc has also exactly fulfilled **the dedicated production zone** and **the vision inspection system** in the BD ROM production procedure that the customers deeply appreciate at present.
