

Eclipse Named Exclusive Supplier For Panasonic LBRs

December 23, 2003

Pleasanton, California – Panasonic's Factory Automation Group has awarded Eclipse Data Technologies the distinction of being their exclusive supplier of formatters for their Laser Beam Recorders including their new CapsuleMastering System. Influencing their decision was Eclipse's ImageEncoder's state-of-the-art design, high-speed capability, networking and scheduling features, and support of all formats and copy-protections.

"This represents a significant win for Eclipse. Panasonic has been shipping Eclipse ImageEncoders with their LBR's for more than two years based on customer preference. During this time, Panasonic and Eclipse have developed a very successful working relationship, which we credit to Eclipse understanding Panasonic's requirements and providing clear solutions that benefit them and their customers", said Bob Edmonds, V.P. Sales & Marketing for Eclipse. "It is particularly gratifying that such a respected and longtime technology leader in the optical market has selected Eclipse as its exclusive vendor of formatters."

About Eclipse:

Eclipse, recognized as the new leader in DVD and CD mastering encoders and software provides leading edge capability with a reputation for technical excellence and world-class customer support in its line of mastering, premastering and QC verification tools.
